-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **SUPPLEMENTAL ACTION**

Note the prior Office Action incorrectly listed Claim 17 as withdrawn and failed to address that claim. Claims 14-17 have been treated on the merits herein.

#### ***Specification***

The disclosure is objected to because of the following informalities: the US Patent status should be updated in the reference to copending applications. Appropriate correction is required.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 4/8/05 was previously and considered but not completely initialed. Accordingly, the information disclosure statement has been initialed as considered by the examiner and another copy provided.

#### ***Election/Restrictions***

Claims 18-46 stand withdrawn from further consideration based on the 3/24/05 reply.

#### ***Response to Amendment***

Applicant's arguments, see the amendment and remarks, filed 3/14/05 (now entered with the RCE filing), with respect to the rejection(s) of claim(s) 14-16

Art Unit: 3762

under 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Krig et al, US-5,978,707.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Krig et al., US-5978,707. See column 5, line 42 to column 6, line 20. VT-1 and VT are available clinical rhythms for selection, each having detection enhancements, i.e. the lower rate which is programmable within a given range, the range being dependent upon the selected clinical rhythm and adding specificity for determining when to deliver shock therapy for the selected rhythm.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any

Art Unit: 3762

invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

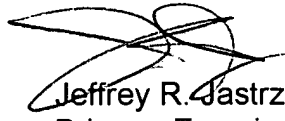

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Krig et al. Krig et al. is silent as to the type of programmer screen used. However, windows based display systems are notorious to the art and merely amount to a design choice for parameter entry by the user at the external programmer. Such a modification to the Krig et al. device would lack patentable moment given the known adaptability of windows based computing at the time of the invention.
